

first choice for your...

contract maintenance requirements

Servitech International specialises in tailoring our on-site maintenance agreements to meet our customers' exact requirements. We understand that the needs of each customer are unique and, as a result, so are the maintenance packages we offer.

Through our team of highly experienced field service engineers, we are able to provide a comprehensive package of routine and call-out maintenance services, ranging from weekly running contracts to annual check-ups, on a national basis. In our efforts to enhance our service to the water process industry, we also provide assistance for compliance with the Urban Waste Water Directive, offering full sampler maintenance and sample management services.

Our services include but are not limited to the following:

- Day-to-day instrumentation Maintenance,
- Emergency Callout (24 hours, 7 days a week),
- Quarterly, bi-annual and annual Preventative Maintenance,
- Flow Meter Calibration and Certification,
- Gauging Structure Surveys,
- Sampler Maintenance,
- Annual Check-ups.

Please contact us for an individual quotation tailored to meet your needs.
