

first choice for your...

in-house repairs and spare parts

Servitech International's new purpose-built 5,500m² premises is largely dedicated to the provision of in-house repair and storage of spare parts. Our team of highly experienced in-house repair engineers is equipped with the latest test equipment, enabling them to repair instrumentation down to component level, including surface mount technology.

We hold a large stock of component parts and sub-assemblies, allowing us to provide a timely and cost effective repair service. We are also able to supply parts ex-stock, enabling your own engineers to carry out repairs quickly and efficiently.

Among the fast growing number of product lines we currently maintain are:

GLI International (Europe only)

Warren Jones (Worldwide)

pHOX Systems (Worldwide)

Hydrolab (UK only)
